# Contract manufacturing

Construction of plastic containers and industrial plants

DIN EN ISO 9001 : 2015

Our flexibility equals the versatility of plastic. From order processing to production and project management, we are perfectly coordinated with each other. We support our customers throughout the entire project, from planning to installation and commissioning. In close cooperation with our partners, we continuously develop innovative solutions to optimize our customers' processes. We have long-standing business relationships with our customers, and we are always a fair, reliable and loyal partner.

## Your advantages

- Production from simple containers to complex systems
- Innovative ideas at fair prices
- Service promise, we are there for our customers!
- Planning, production, assembly, commissioning
- Steel construction and stainless steel workshop

## Services

- Storage tanks for chemicals
- Circular & rectangular containers
- Plastic construction
- Piping construction
- Plant construction
- Metal construction

**WE ARE YOUR EXPERT IN THESE AREAS: PLASTIC PROCESSING, PLASTIC CONSTRUCTION, PLANT AND CONTAINER CONSTRUCTION AND PIPING CONSTRUCTION.**

### SAFE STORAGE IN OUR STORAGE CONTAINERS

We are a WHG-registered specialist company being perfectly coordinated with each other in production and installation. All tasks are carried out by certified plastic welders who are constantly enhancing their skills.

## Plastic tanks

- Plastic tanks (PE, PP, PVC-U)
- Circular, cylindrical, rectangular
- Above ground and underground
- With steel or plastic reinforcement
- Test documentation

## Piping construction

- Complete piping systems
- Materials PP, PE, PVC and PVDF
- Butt welding or electric socket welding process
- Dimensions from 16 mm up to 500 mm
- Complete bracket construction
- Standard & special shapes

## Customized special design

- Customized plastic products
- Repair and maintenance tasks
- Modernizations and upgrades
- Prototype construction
- Production of special and tailor made parts

## FLEXBIO TECHNOLOGY

Your expert for plastic, steel and plant construction

## Applications

- Wastewater treatment plants
- Industrial wastewater treatment
- Drinking water storage & treatment
- Chemical and pharmaceutical industry
- Food production
- Slaughterhouses
- Beverage producers
- Agriculture
- Swimming pool technology
- Aquaculture / fish farming / recirculation systems
- Marine applications

## Accessories

Pumps, piping, heating/trace heating, insulation, ladders, service platforms and pedestals, brackets, flanges, fittings, coatings, paintwork etc.

## Modified container applications

- Wastewater treatment and biogas technology in a modular container design
- Full liquid manure treatment and conversion to process water, as well as sustainable fertilizer
- Biowaste and wastewater become bioenergy
- Swimming pools

## Metal processing

- Steel and stainless steel constructions
- Certified welding
- Production in accordance with ISO 3834-3
- Surface preparation and corrosion protection in accordance with EN ISO 12944 up to C5, marine quality
